To those who regard a car as an Investment

McLAUGHLIN-BUICK enjoys the largest measure of public confidence and popular acceptance ever accorded any fine car because McLaughlin-Buick represents the safest investment, the firmest security and the highest return.

The buyer of a McLaughlin-Buick consciously invests his money in more miles of transportation, in greater comfort and luxury, in more satisfying performance, in absolute dependability.

Such phenomenal advances as the McLaughlin-Buick Engine, Vibrationless beyond belief - Torque Tube Drive - Mechanical Four-Wheel Brakes - Sealed Chassis - Vacuum-cleaned Crankcase - are evidences of the firm determination to keep McLaughlin-Buick always the standard by which automobile investment values are judged.

Those who regard a car from an investment standpoint should first consider McLaughlin-Buick, not merely its quality and beauty today, but its lasting dividends of undiminished satisfaction.

Claresholm Local News

BROWN-LEVY

Mrs. Calahan Sr. is a patient in the hospital.

Mrs. O. C. Arnestad was able to return home from the hospital on Thursday.

Mrs. Seymour of the Meadow Creek district is a patient in the local hospital.

The roads are almost impassable now for automobiles from the heavy rainfall this week.

Claresholm U. F. W. A. Local will hold their regular meeting in the rest room on May 27.

G. Erickson has started work this week on building a brake repair service station for autos.

Mr. and Mrs. Johnson of Nakama were here to attend the funeral of Mrs. Craney on Wednesday.

Earle, little daughter of Mr. and Mrs. Don McLeary, was in the local hospital a few days this week.

Rev. R. W. Dalgleish went to Calgary on Friday to attend the general conference of the United church.

Wilfred Harrison returned home on Saturday from a two weeks' vacation in Calgary and district.

Alvo Dimmett of Stacey was admitted to the hospital here last Saturday for an operation for appendicitis.

E. Payne, an old timer here, is in town this week looking after the interests of the Knights of Pythias, and visiting relatives.

Mr. and Mrs. J. D. Dickerson left Wednesday morning for a motor trip to the coast, going by way of the Crow's Nest Pass.

Rain and wet snow this week have made a superabundant supply of moisture here. According to reports it is general throughout the province.

The medal contest promised by the girls of the I. T. L. will be held in the United church on Monday evening, May 30. Watch for further particulars next week.

Arthur Somers Roche's extraordinary thriller, "The Mystery Club," with Matt Moore, Edith Roberts, and Mildred Harris, at the Rex theater Friday and Saturday nights this week.

During the past several years people have frequently been heard to express the opinion that due to climatic changes the worst seasons were gone forever, but so far this season has all the earmarks of the old time wet summer.

MRS. G. H. CARNEY DEAD

The news of the sudden death of Mrs. G. H. Carney brought shock and grief to relatives and many friends here. She died of heart failure, at the home of her brother, W. H. Fairchild, Scamton, North Dakota, while on her way home from California, where she had spent the winter.

She was in her 56th year, and leaves besides her husband, one son, Clarence, and three daughters, Mrs. H. H. Schumacher, Mrs. Eldred Burham, and Mrs. J. Schumacher, all residents of this district.

The body was brought here for burial, the funeral service, conducted by Rev. R. W. Dalgleish, being held in the United church on Wednesday. There was a very large attendance of friends of the deceased at the service. Mrs. Adolph Amundsen sang "The City of Dreadful Night."

The remains were laid to rest in Clareholm cemetery.

The sympathy of the entire community is extended to the family in their sad bereavement.

Card of Thanks

We desire to express our thanks to all who so kindly assisted us during our recent bereavement, and for the many beautiful floral offerings.

G. H. Carney and Family.

A very pretty wedding was solemnized by Rev. Mr. Langille in the United church at Granum on Sunday, May 15th, when Mrs. Katherine Levy, third daughter of Mr. and Mrs. L. O. Hart, was united in the holy bonds of matrimony to Mr. Henry H. Brown of Medicine Hat.

The bride, very becomingly gowned in pale pink crepe de chine with overdress of gold lace, and carrying a beautiful bouquet of opheelia roses, entered the church on the arm of her father to the strains of Lohengrin's wedding march.

The bride's sister-in-law, Mrs. Wm. Hart, acted as bridesmaid, while Mr. Wm. Hart supported the groom.

During the signing of the register the choir sang "The Voice That Breathed Our Eden." After the ceremony the happy couple with the immediate relatives repaired to the home of the bride's parents where a dainty luncheon was served.

After a honeymoon trip, spent at Calgary, Banff and other resorts, Mr. and Mrs. Brown will reside at Medicine Hat.

CHAUTAUQUA PROGRAM

The following are some of the features that will appear on the Chautauqua program this season.

The Schubert Quartet, Canada's foremost singing four, with programs including opera, classics of the great masters, sacred, secular and novelty numbers as well as musical comedy and popular selections.

Te John Ross Reed Company, which is more than a group of talented artists, for they combine voices of sterling quality with rare dramatic ability.

"Smilin' Thru," a play of unprecedented popularity, presented by the Martin Erwin Players.

J. Smith Damon, the pottercraftsman, with a lecture full of the brightest and best thought.

The Plantation Singers in the old negro jubilee songs. They have voices of wonderful melodiousness.

Maupin's Singing Band, an organization of splendid instrumental and vocal artists. They give a peppy, punchy, popular program.

"Give and Take," a delightful comedy of modern day business problems. Through it is woven a modern and thrilling romance.

Herbert A. Taylor in a special children's program: juggler, magician and comedian who stands in the world of magic alone and unapproached.

Walter J. Millard, lecturer, will present a strong, thought-provoking message. Mr. Millard is a popular speaker with a vigorous and resourceful mind and a fine speaking voice.

MAJOR SCHOOF DENIES CHARGE

(Vancouver Sun)

Major G. H. Schoof of Clareholm, Alta., is in the city en route from southern United States points to his home from where he will soon set out on his summer's patrol as a fisheries and game guardian.

Major Schoof denies a recent report that he claimed, while in the United States, to be a veteran of the Royal Canadian Mounted Police. He says he never used the prefix royal.

As for being a mounted policeman, Major Schoof claims he is entitled to so describe himself. His police work during the summer is done while mounted.

Major Schoof will get his horses at his Clareholm farm, and will use companionship with the summer travelling in the Crow's Nest Pass, the Elk Lake country, and in the far-western range district in Alberta. He patrols on both sides of the line between Alberta and British Columbia, having authority from departments in both provinces to protect fish and game.

ANSWERS TO LAST WEEK'S QUESTIONS

113. Can There Be a "Treaty Between States" of the U. S.?
States can make treaties between themselves when ratified by congress. Several boundary disputes have been settled by treaty—between Virginia and Pennsylvania in 1780, Kentucky and Tennessee in 1820, New York and New Jersey in 1834, Washington and Oregon settled a fishery dispute, and New York and New Jersey a sewage disposal dispute in this way. A treaty known as The Colorado River Compact is now being considered between seven large western states; it provides for the storage and distribution of the waters of the Colorado as follows: 7,500,000 acre-feet annually to the upper states of Colorado, New Mexico, Utah and Wyoming, and 8,300,000 to the lower states of Arizona, California and Nevada.
114. Why Does a Dog Turn Around Three Times Before Lying Down?
It seems to be a case of heredity; that is, doing what his ancestors did. The dog of long ago, before he became domesticated, lived in the wilds; and often prepared for sleep wherever he found himself. He learned from experience that he had a more comfortable bed if he smoothed out the rough places. He accomplished this by twisting his body into a curved shape and turning around three times, using his body to smooth out the grass, brush or leaves before lying down.
115. Where Does the World Get Its Rubber Supply?
As late as 20 years ago the world's output of raw rubber was about 60,000 tons annually, mostly "wild" rubber from the native forests of Brazil, only 174 tons of this being "plantation" rubber. About 1900 they began the development of rubber tree plantations in accordance with forestry practices—about 200 trees to the acre, producing their first small crop at the end of fifth year. The output of wild rubber has steadily declined—it is now about 30,000 tons annually—while the plantation rubber output in 1924 was 386,000 tons, mostly from the Malay Peninsula, the island of Ceylon, and the Dutch East Indies.
116. What Is the National Geographic Society, Washington?
Founded in 1888. "For the increase and diffusion of geographic knowledge." Present membership is about one million. Has extended its activities to every part of the world; done much for the promotion of science and its practical application to human welfare. Aided materially in furthering Arctic explorations; and has unearthed extensive ruins of ancient civilizations in Mexico and Peru. The geographic knowledge constantly being obtained by the society is diffused principally through its publication, "The National Geographic Magazine."

117. What Different Animals Supply the World's Milk?
The milk of most civilized countries comes from the cow. The physical differences of the various countries determine the animal best suited for milk production. In the Arctic regions the Laplander obtains milk from his reindeer; man's milk is much used on the steppes of Russia and in central Asia; camel's milk is well liked in desert countries; goat's milk is common in the rocky regions of Europe and in the mountains of Central America; the buffalo furnishes the milk; llama's milk is used in parts of

New Issue

\$1,700,000

The Canadian Western Natural Gas, Light, Heat and Power Company, Limited

6% Participating Sinking Fund Preference Shares

Preferred as to capital and dividends. Cumulative dividends at the rate of 6% per annum payable quarterly March 1st, June 1st, September 1st and December 1st, by cheque payable at par at any branch in Canada of The Royal Bank of Canada, or in United States funds at the Agency of The Royal Bank of Canada in New York. Redeemable as a whole or in part at the option of the Company on any dividend date on sixty-day notice at 105% of par value plus accrued and unpaid dividends to date of redemption. In addition to the fixed dividend of 6% per annum, holders of Preference Shares shall be paid a further dividend of 1% per annum, in the event of the Company declaring and paying dividends at the rate of not less than 7% per annum on the ordinary shares.

The Company operates under the jurisdiction of the Board of Public Utility Commissioners for the Province of Alberta, which has the right to supervise operations of the Company's properties and to fix, determine and regulate rates so as to provide a reasonable return to the Company and ensure the sale of gas at equitable rates.

Annual Sinking Fund to commence December 31, 1930, for exclusive retirement of Preference Shares, equal to 2% of all issued Preference Shares.

There will be placed with the Montreal Trust Company for the exclusive retirement of the Company's 5% Registered Debenture Stock a sum equal to the par amount of all such Debenture Stock now outstanding. These Preference Shares, therefore, will be, in effect, the senior security of the Company.

For detailed information, we refer to the prospectus containing letter from Mr. C. J. Yorath, President of the Company, which has been summarized in part as follows:

The Company

The Canadian Western Natural Gas, Light, Heat & Power Company, Limited, produces and distributes natural gas for heating and industrial purposes to the cities of Calgary and Lethbridge and the towns of Granum, Clareholm, MacLeod, Nanton, Okotoks and Brooks. The Company serves a population of approximately 85,000 and the number of consumers has increased from approximately 5,000 in 1913, to in excess of 15,000 at the present time.

Properties

The Company owns 21 producing gas wells, mainly in the Bow Island and Foremost gas fields. The Company has entered into an agreement to purchase substantial quantities of gas from the Royalty Oil Company, Limited (a subsidiary of Imperial Oil, Limited), which operates important wells in the Turner Valley.

Earnings

For the three years and three months ended December 31, 1926, net earnings available for dividends on Preference Shares and income taxes, as certified by Messrs. George A. Touche & Company, Chartered Accountants, Calgary, were at the rate of \$435,429 per annum—equal to over 2.8 times dividend requirements on all Preference Shares now outstanding, including those proposed to be issued.

The above earnings are after operating expenses, including maintenance and repairs, and after deducting an average of \$185,977 per annum set aside for amortization in accordance with Order of the Board of Public Utility Commissioners for the Province of Alberta, dated November 16, 1926.

Assets

Tangible assets of the Company, as determined by Board of Public Utility Commissioners for the Province of Alberta for rate making purposes, were valued, as at November 16, 1926, at \$6,192,440, or equal to over \$258 for each \$100 of par value of Preference Shares now outstanding and including those proposed to be issued.

Preference Shares

The authorized amount of Preference Shares of the Company is \$3,000,000, of a par value of \$100 per share, of which \$2,600,000 par value will be outstanding, including the shares proposed to be issued. Preference Shares are preferred as to capital and dividends, but they are non-voting, unless four quarterly dividends shall be in arrears.

Except with the consent of holders of 60% of all Preference Shares outstanding, the Company shall not permit the creation of any further mortgage or charge upon its properties to secure any issue of bonds, debentures or debenture stock, nor, except with such consent, shall the aggregate in par value of all Preference Shares to be at any time outstanding exceed 50% of the value of the Company's fixed assets to be determined upon the same basis as that fixed by the Board of Public Utility Commissioners for the Province of Alberta.

We offer these Shares for delivery if, and when issued and received by us and subject to the opinion of our Counsel at:

Price: 97 and accrued dividend, yielding 6.19%

talk, flattery, untruths. The "Blarney Stone," suspended outside the castle near the top, is said to make those who kiss it proficient in the use of blarney. This ceremony is observed by thousands of visitors. The stone is now accessible from the inside of the keep; formerly those who kissed it were held by the ankles, head downward, over the side of the wall.

119. What Is the Welland Canal?

The present Welland Canal, located in Ontario, connects Lakes Erie and Ontario; is 26½ miles long; has 25 locks, each 270 ft. long, 45 ft. wide and 14 ft. deep on the sill. The new Welland Canal will be completed about 1930 at a cost of 110 million dollars. Excavated to a depth of 25 ft., with provision for 30 ft. when needed; will have 7 locks, each 820 ft. long, 80 ft. wide, and will provide for vessels drawing 30 ft. of water; each lock will have a rise of 46½ ft. When the U. S. and Canada ultimately provide a navigable deep waterway and hydro-electric development in the St. Lawrence River between Montreal and Lake Ontario, the Welland Canal will provide the means of lifting ocean vessels from Lake Ontario to Lake Erie.

5000 FACTS ABOUT CANADA

Canada's jubilee year, celebrating the sixty years of Confederation, is fittingly emphasized in the 1927 issue of "5000 Facts about Canada," the famous tabloid cyclopaedia of the Dominion compiled by Frank Yeigh, the well known Canadian publicist and author. It is a tonic to read of our remarkable national progress, as tersely set forth in this unique booklet, under fifty chapters, from "Agriculture" to "Yukon." The contents are more varied than ever, and will prove a revelation to the reader. No better way of making known our resources, wealth and prospects exists than this publication, and it should have a wide circulation this year. The Government could well afford to use it widely in this and other countries. Copies may be had from leading bookstores, or by sending 35 cents to Canadian Facts Publishing Company, 588 Huron Street, Toronto 2, Canada.

CHURCHES

ST. JOHN'S CHURCH OF ENGLAND

5th Sunday after Easter.

12 o'clock—Sunday school and Bible class.

7:30—Evening service. Subject, "Triumph Over Difficulties," Prose, Rev. W. Barlow, L. Th.

Last Sunday we saw the difficulties Zacharias had in accepting Christ, next Sunday evening we will see how he overcame his difficulties and received the personal salvation offered to him by Christ.

All are welcome. Bright service. Come and bring a friend.

UNITED CHURCH

11 a.m.—Based on Luke 14 and 18 and on Acts 26. I will speak on "The Value of an Empty Pocketbook." A message also for boys and girls.

7:30 p.m. Subject—"An Empire Day Message."

Rev. R. W. Dalgleish.

Church of the Nazareth

Friday evenings 8 o'clock—Bible study.

We invite you to come and worship with us in these services.

South America.

118. What Is the "Blarney Stone?"

Blarney is a village and castle near Cork, Ireland. Tradition has it that during an amissance when synonym for smooth, wheedling

Blarney Castle was besieged by the English, the commander of the castle delayed from day to day the promised surrender by soft speeches and persuasion. Hence "Blarney" has become a synonym for smooth, wheedling

Correcting Social Ills

Parental Qualifications Necessary for Training of the Rising Generation

The home and lack of proper training of children in the home have been published mainly for a wide array of social ills, ranging from the jazz age to crime. In brief, the responsibility has been placed on the parents.

Such being the case, what constitutes a good parent? For the qualifications for a father or for a mother?

A. D. Hardie, an outstanding English educationalist now directing the educational division of social hygiene work in the Dominion, recently summed up the matter for local workers. His findings follow:

1. Good health. Good stock and a desire to keep himself and his family healthy for a long life by proper exercise and regular physical examination.

2. Companionship with his children. An ability to see things from their point of view. An ability to retain their confidence in an adult.

3. Good general knowledge, so that his conversation is worth listening to at home.

4. A good example to his children, especially in his attitude towards life and his own work.

Qualifications of a father:

1. Good health. Good stock and a desire to keep himself well for the good of his home.

2. Sympathy, such as only a mother can have, in all that concerns her husband and children.

3. Good knowledge, the result of study and not of instinct, of child education.

4. Good knowledge of the physiology and physical and spiritual needs of her son as well as her daughter and the ability to prepare both for the adventure of life.

Women Physicians

More Confidence Now in Women Doctors Than in Former Years

Eight prospective women graduates from the faculty of medicine in the University of Toronto were honored at a dinner by the women's College Hospital. Speakers, who told of the experiences met with by women doctors in the early days, in which Dr. Augustus G. Gaulton, whose mother, Dr. Emily Stowe, was the first woman doctor in the world. To achieve that position, it was necessary for her to attend a medical college, where she was the only student of her sex.

Dr. J. W. S. McCullough, provincial M.O.I., declared that the women's hospital of Toronto, which was the only one in Canada, was neither too modest nor too ambitious. The public opinion had changed greatly and there was far more confidence in women doctors than there had been in the past, he said.

English Farming To Go

Dry Goods Trade Will Eliminate Coin From Price Calculations

The furthing, British's smallest coin, is doomed. Sooner or later, merchants say, it will have to disappear. The "brasserie" Chamber of Trade, which is the central organization of the dry goods trade, has just decided to eliminate the furthing from its price calculations. Hence small articles, such as spoons of cotton, will either be priced in half-pence or sold by twos. A furthing is worth about half an American cent.

New Canadian Industry

A cable from London, England, reads: "Following the perfection of a method for the production of artificial wool from pine needles by British and German scientists, the fish financial and industrial corporation is in touch with the Quebec Provincial Assembly's intention of establishing such an industry in Quebec province."

Passenger — "What makes this train so slow?"

Conductor — "If you don't like it, get off and walk."

Passenger — "I would, only I'm not expected until train time."

The eyes of a frog when exposed to the light of a candle, will generate an electric current easily enough to start a gramophone.

She-talked with a very interesting man today. He was a Dutchman. He—Oh, I'd love to meet him. All my greetings are willing.

One kangaroo will eat as much grass daily as six sheep.

W. N. C. 1678

Nurse Crops For Alfalfa

Many Advantages Are Shown For Using Nurse Crops When Seeding Alfalfa

There is considerable advantage in using a nurse-crop when seeding alfalfa. It greatly reduces the initial cost of production, and, except where the land is exceptionally clean, helps to prevent the weeds from retarding the development of the young alfalfa plants. The stubble of the nurse-crop tends to hold the snow and thus reduce the possibility of winter killing.

Tests were made, during the last three years with wheat, oats, barley and flax as nurse crops, at the Brandon, Manitoba, Experimental Farm in all three years, flax, on account of its shallow root-system and the small amount of seed it carried, proved the least detrimental to the young alfalfa plants. Wheat, on the average, was better than oats or barley as it stands up better and its smaller seed development allows more sunlight to reach the alfalfa.

In the experiments the alfalfa was seeded at the rate of 18 pounds per acre, while the nurse crops with the exception of the flax, was sown at a rate of 12 to 15 pounds per acre, when normally used. In seeding, the alfalfa seed was sown with the grain in the grain box.

British Yards For Alberta Farms

Will Make Selection of Boys in England and Farm Training

Instructions are being sent to Lord Herbert Greendell, immigration officer for Alberta, to look after the selection and recruitment of some 75 British boys for farm work in the government agricultural schools. The boys are to be of 18 to 21 years of age, and Mr. Greendell, who will cooperate in the work with the Overseas Settlement board, and the Dominion immigration officials is being asked to request the British authorities to select the boys in the selection. They will come out next autumn in time for the fall term at the schools.

Hon. George Headley, minister of agriculture, says that the results of previous efforts in this line have been highly satisfactory, with a better average of success among the 151 boys thus far brought out under the scheme than in any similar group of new comers. It is hoped, however, to raise the standard still higher and to have Mr. Greendell's personal supervision in England will be invoked.

Pasture Crops for Growing Hogs

Rope Is Proven to be Best Pasture, Being Better Than Millet or Oats

Tests of different pastures for growing hogs have been made at the Brandon, Manitoba, Experimental Farm. The pasture used was rope millet and oats. In this experiment, rope had double the carrying capacity of either millet or oats, one eighth of an acre of rope providing forage for seven hogs for forty-eight days. The hogs on rope pasture gave an increased revenue of \$5.10 per acre over those on a bare lot, while the hogs on millet pasture gave \$29.40 and those on oats \$12.60 more per acre than the bare lot hogs.

It is important to provide shade for pigs on pasture, and to take steps to prevent sunburn especially during the first two weeks of pasture.

His Luck Still Held

A woman with a particularly disagreeable expression had been looking forth to the man sitting next to her at the dinner party.

"Ah," she said at last: "my husband has always been lucky. As a child he played with a horse, but was injured; as a youth the fox broke beneath him, but he wasn't injured; and now, when a young man was caught in an avalanche, but escaped unhurt."

"Yes," put in the man, quietly but strangely at you for twenty years and is still alive.

Housekeeper Must Be "Mrs."

Mrs. Victoria Grant has now become Mrs. Victoria Grant. She had acquired a husband, but was appointed housekeeper at Baltimore and it is a long-established custom that women housekeepers acquire the title of "Mrs."

"Mistress" Miss Grant is the daughter of A. P. Grant, former lieutenant-governor of Ontario. Queen Victoria was her godmother.

The amount of time given to read the newspaper depends upon two things: the newspaper and the reader.

Visitor to studio: "What is it?" Artist: "A sunset. Haven't you ever seen a sunset?"

Visitor: "Yes, that's what I asked."

Our High Wealth Average

Western Provinces Have the Highest Per Capita Wealth in Canada

We hear a great deal about the wealth of the Dominion being concentrated in the east. For this the income tax figures are responsible. There are a great many more rich individuals there than in the newer parts of the country. It is not surprising that this is so. But the fact that the returns from this income are heavier in Ontario and Quebec does not mean that the general level of wealth is greater in those provinces than with us.

Census statistics that have just been issued show that it is not. The per capita wealth of Ontario is put at \$2,567, and that of Quebec at \$2,247, while the respective figures for Manitoba, Saskatchewan and Alberta are \$2,705, \$2,757 and \$2,317. It is the average that counts and the figure that is furnished by the bureau is very enlightening. It demonstrates on what a solid basis Western Canada now rests, though it is still so near to the beginning of its development—Edmonton Journal.

Seaplanes May Be Used

Would Reduce Flying Time Between London and Paris

Folks who travel from Paris to London and vice versa by air have long deplored the loss of time occasioned by the distance of the flying fields of Le Bourget and Croydon, the two airports. The latter is about twenty-two and three hours, when as the annual flight takes less. Experiments with seaplanes, are to be made between Paris in the Seine and the Thames, almost in the hearts of the two capitals, and it is expected the time will be greatly reduced.

The hides from 600 steers were, used recently to make the largest leather transmission belt in the world.

Bill—"Jerry is clever."

Mac—"Yes."

Bill—"He remembers Iren's birthday but forgets her age."

A pessimist is a man who prefers artificial light to genuine sunshine.

The same postulate has been kept in the same family for more than 200 years at Krigslund, in northern Simla, Sweden. Since 1708 fathers and sons of the Mearling family have been elected to the office.

It is a sort of trifle with a champagne flavor. The old recipe is as follows: Cut ordinary white bread into cubes, and pour over them the yolk of one egg beaten up in a glass of Malaga wine. Dip the soaked stumps in beaten egg and fry to a golden brown in deep boiling lard. Drain well and sprinkle with cinnamon and sugar.

Assembling a Meal

President Bixler of the A.M.E. church, said at a Lincoln's birthday reception in Atlanta:

"School teachers and college professors don't grow rich, but at that age have been known to die."

"Lincoln used to tell a story about a school teacher who said to his pupils one day:

"If each child will bring an egg to school tomorrow I will show you how Christopher Columbus made his egg stand on end. Those who can't bring an egg kindly bring a piece of ham."

Keeping a Secret

They were discussing whether women or men were the most trustworthy in business.

"No woman can keep a secret," said one man, confidently.

"I don't know so much about that," retorted the forbidding looking man, seated opposite him. "I've kept my age a secret ever since I was 24."

"Oh," he replied, "you'll let it out one day, I am sure."

"Never!" she exclaimed. "When a woman has kept a secret twenty years she can keep it forever."

Alberta Oil Development

The Union Oil Co. of California has closed a contract to drill another deep test well in the new Wildcat oil fields of Alberta for the Canadian Western Natural Gas, Light, Heat & Power Co., a subsidiary of the International Utilities Co.

The Union Company is also to drill a deep test well in the Viking field, while the Imperial Oil Co. is drilling a 3,500 feet well on another large lease belonging to the International Utilities Corporation.

Mrs. Waring (on the phone): "Hello, is this the Information Bureau?"

Video: "Yes, madam. What do you wish to know?"

Mrs. Waring: "Well, if it isn't too much trouble would you please tell me how Mrs. Taylor paid for her spring hat?"

Record Price for Star

A French actor of 70 years was realized by "Eclipse Ltd." at the date of price called at the London stock exchange.

This actor was the whole of the previous year's year.

More Immigrants Arriving

For eleven months of the last fiscal year ended February 29th last, 123,720 immigrants entered Canada.

This was 12,000 more than the record for the whole of the previous year's year.

Record Price for Star

A French actor of 70 years was realized by "Eclipse Ltd." at the date of price called at the London stock exchange.

This actor was the whole of the previous year's year.

Cleaning Dairy Utensils

Bailing Water or Steam is Necessary For Sterilizing

A plentiful supply of bailing water or steam is a necessity for the cleaning and sterilizing of pails and other utensils. It is a housekeeping clean milk to be obtained. Detailed instructions for cleaning dairy utensils are contained in a new pamphlet on "Producing Clean Milk" issued by the Dominion Department of Agriculture. The utensils should be placed in cold or lukewarm water immediately after using, and then they should be washed well in warm water to which soda, or a dash of cleaning powder has been added.

After washing, the utensils should be rinsed in clean hot water to remove traces of the cleaning solution.

But even this is not altogether sufficient. Utensils that appear to be perfectly clean may contain many thousands of germs. Where steam treatment is available the sterilizing is best done by placing the utensils in a closed container and having steam into it for 15 minutes.

After the case or pails over an iron set for a couple of minutes is also a good method. When live steam is not available the utensils should be placed in scalding water for at least two minutes. Don't use a cloth to dry the utensils as it will only add germs.

Clean utensils however, are only one item in the production of clean milk. Equal care must be taken at every stage from the time the milk leaves the cow until it is consumed or sent to manufacture.

The necessary precautions are, to hold the new pamphlet, which may be obtained from the publications branch, Department of Agriculture, Ottawa.

Our Modern Marvels

Apparently we need not expect television to be in practical operation for some time. Still, science goes ahead rapidly nowadays. Before we know it, the radio set may have become a radio-visual set, and the radio set that occupied a thousand and one Arabian nights no longer hold any greater wonders than our modern marvel.

Those under the fatal spell of the radio set, who return upstairs to rebroadcast the removal of the useless one, who have never seen daylight, and who died buried in the same cellar.

Coronation Chair Most Famous

But Others Worthy of Notice Have Been Preserved for Centuries

The coronation chair in Westminster Abbey, which contains the Stone of Destiny, probably is the most famous chair in the world but there are many others worthy of notice. The chair in which the Japanese Emperor sat during his trial in Westminster Hall is kept in the glass case in the board room of the Cottage Hospital, Gloucestershire. At Longfist Castle, Wiltshire, London, is an armchair of solid steel presented by Emperor Rudolph II. to the people of Augsburg in 1577.

It is said thirty years were required to make this chair, and it is valued at £20,000. It is covered with historical and symbolic scenes, each said to be the work of a great master. One of the most beautiful chairs is that of Elizabeth, queen of the Franks, who died in 658. It is made of east and chased bronze of fine workmanship.

One Way to Solve Problem

Seen in Urinal Movement, Impression Cells All People Over Forty

"That life has become extremely complicated of recent years, many people are finding it difficult to cope with it. One way to solve the problem is to see a urinalist. This is a person who has solved the problem."

The World's Storm Factory

Worst Weather Experienced Between North and South Poles

We think of the Arctic region as a country of terrible frosts and storms. This is a mistake. From the seventh degree of latitude, and runs through the middle of Greenland, Iceland, Greenland, and the top of Siberia to the North Pole, is a line weather area. Storms are rare, the snowfall is not great and the barometer stands high and steady for weeks on end.

South of latitude thirty—that is, in the line north of the Southern China, North Africa and cutting the American continent from New Orleans through Northern Mexico—we have another broad belt of fine weather. Not so steadily fine as northern north; yet a space where the weather is not too high and where it is possible to predict the weather for some days in advance.

It is the most beautiful of latitude that the world's worst weather is experienced. The whole of the North Atlantic between these parallels is a breeding place of bad weather, and a large part of the United States and Canada may be included under this high and stormy belt. The British Isles lie in the worst part of this vast storm factory, and the west coast of North America is somewhat similar to those in the North, only worse, owing to the Gulf Stream.

Continents in the Southern Hemisphere are somewhat similar to those in the North, only worse, owing to the Gulf Stream.

W. C. T. U. CONVENTION

The annual convention of Calgary District Women's Christian Temperance Union was held at High River on May 11 and 12, in the town hall which was kindly lent for the occasion.

Most of the morning was spent in receiving the delegates from different districts. Mrs. McKinney, the provincial president, together with Mrs. White of Nanaimo, the district president, delegates representing Calgary, Nanaimo, Granum, Claresholm, Parkland, Okotoks, and Calgary were also present. Every minute was represented save one, including two young women from Claresholm and Calgary.

The meeting was opened by prayer, Bible reading, and addresses which were very helpful to all present, showing the importance of the work which is being carried on by the W.C.T.U. throughout the district. Reports were also read which were very encouraging.

One special feature of the program was a demonstration of model T.T.L. given by the High River children under the supervision of Mrs. Buchanan; also a gold medal contest which was won by Miss Wainman of Nanaimo.

On the evening of May 11th a banquet was tendered to the delegates attending the convention in the United church hall, when about one hundred persons were present, given by the local W.C.T.U. of High River. The toast of "The King" was proposed by Mayor Young. The gathering then sang "God Save the King." Mrs. Kelly proposed the toast of welcome to the W.C.T.U. delegates. Mrs. McKinney of Claresholm responded in a most effective and impressive manner.

The ministers of all denomina-

tions were present and extended greetings to the association, expressing the hope that their deliberations would be fruitful of good results at the convention. Mrs. White of Nanaimo was chosen as delegate to the national convention which is to be held at Vancouver next June.

The rain has again made the soft spots about town bottomless mudholes, and many cars have been mired down this week in the streets.

On account of the wet weather the opening baseball league game which was to have been played at Staveland on Wednesday was postponed.
